Manual Shomoos Registration Costs Time, Errors, and Violations

Five daily challenges faced by every Haramain hotel every day

1 Manually entering each guest's data into Shomoos consumes your team's time

Every guest requires opening Shomoos, entering data, and waiting for confirmation. During Hajj and Umrah seasons the problem multiplies.

2 Spelling errors in guest data cause registration rejections

Manually copying names or ID numbers opens the door to mistakes. Every error means re-entry and wasted time.

3 Check-outs are forgotten or delayed and violations accumulate

There is no automatic reminder for check-outs. Staff forget to send the departure to Shomoos until alerts pile up.

4 Registering large groups (Hajj and Umrah) is a manual nightmare

A bus of 40 pilgrims takes hours to enter one by one. Your team is busy with data entry instead of serving guests.

5 You don't know whether all guests are registered or not

No dashboard shows sync status. You only discover the problem when surprised by the Ministry of Interior.

The Real Transformation

What Changes with ASOFT Shomoos

From manual complexity to complete automation at every step

Before ASOFT Shomoos	After ASOFT Shomoos
Manual data entry for each guest in Shomoos	Scan the document – 6 fields ready in one second
Spelling errors and rejected registrations	100% accurate data taken directly from the document
Check-outs forgotten and delayed	Auto sync every 3 hours – check-in and check-out
Large groups take hours to process	Full group with one click – perfect for Hajj and Umrah
No visibility on registration status	Every booking in view: registered, updated, or has an error

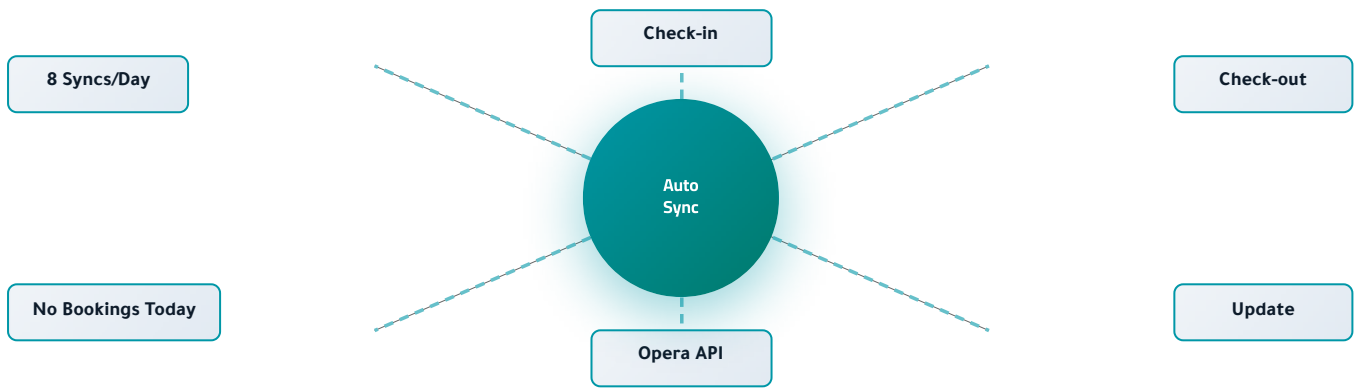

Shomoos Booking List | ASOFT

Arrival Date From To Nationality Room Number Guest Name Search

#	Guest Name	Nationality	Doc Number	Arrival	Nights	Room	Check-in Sync	Check-out Sync	Error Message
1	محمد العتيبي	Saudi	10XXXXXXXX	15/05	3	101	Yes	Yes	-
2	James Wilson	British	UK2XXXXX	15/05	2	202	Yes	Pending	-
3	راج باتيل	Indian	23XXXXXXXX	15/05	5	305	Error	-	Invalid document number
4	سارة الزهراني	Saudi	10XXXXXXXX	16/05	1	104	Yes	Yes	-

The System Handles Sync Automatically

No manual intervention, no forgetting, no violations – sync runs in the background all day long.

Auto Sync with Shomoos

- ▶ Check-in is sent automatically when booking is registered
- ▶ Check-outs are sent as soon as departure is recorded in the system
- ▶ Sync status report for every guest – registered, pending, or has an error
- ▶ Automatic retry if connection fails
- ▶ Status dashboard showing every booking and its sync status

Opera & Hotel System Integration

- ▶ Connects to Opera directly via data files
- ▶ Works with any other hotel system via data files
- ▶ No need to enter data twice
- ▶ Automatic update for booking changes
- ▶ Full log of every sync operation

The screenshot shows a dashboard titled 'Shomoos Sync Status — Today' with a 'Live' indicator. It features four summary cards: 'Total Bookings' (84), 'Sync Successful' (79), 'Pending' (3), and 'Failed' (2). Below these is a section for the 'Last Sync Cycle — 14:00' with a table of sync activities:

Activity	Status
Check-in – 27 guests	Completed
Check-out – 18 guests	Completed
Data Update – 5 bookings	In Progress
Next Sync	17:00

How to Start

How to Get Started with ASOFT Shomoos?

Three simple steps between you and complete automation

01

Book a Demo

We show you the system on your hotel's actual data in 30 minutes – no commitment

02

Setup & Integration

Our team installs the system and connects it to Shomoos and your hotel system within days – no complexity

03

Go Live

Your team scans documents and the system handles the rest from day one – with continuous technical support
